

Criteria	Comments	Points
Code: Protocol Correct definition of the data split / protocol	Comment	/5 pts
Code: DataLoader Appropriate dataloader with correct normalization, data augmentation, etc	Comment	/13 pts
Code: Network Architectures Correct definition of network architectures	Comment	/20 pts
Code: Training Correctly define the necessary training components, train the models, and plot graphs	Comment	/17 pts
Code: Testing Test using the appropriate set	Comment	/5 pts
Report: Experimental Protocol Clearly and briefly define your experimental protocol	Comment	/5 pts
Report: DataLoader Explain any pre-processing performed in the dataloader, including any normalization, data augmentation, etc	Comment	/12 pts

Report: Networks, Strategies, and Components Briefly describe the (concept of the) exploited network architectures and strategies, as well as the components required for training	Comment	/13 pts
Report: Results Report and discuss the table with the training results - clearly define the best model	Comment	/5 pts
Report: Test Table and confusion matrix reporting the final results using the best model on the appropriate set	Comment	/5 pts
