

Introduction to Data Mining & Visualizaton

Procheta Sen

Procheta Sen

- ▶ Lecturer at the Department of Computer Science since July 2022.
- ▶ Postdoc at University College London.
- ▶ Research interests: Natural Language Processing, Explainability of Large Language Models.

Schedule

- ▶ Week materials release — Wednesday.
- ▶ Lab sessions — Monday, Tuesday, Thursday, Friday

Materials

- ▶ Reading materials (use module's Reading List)
- ▶ Quizzes / Problem sets
- ▶ Lab tasks

Lab Sessions & Tasks

- ▶ Lab tasks release — Monday.
- ▶ Try to work on some of the tasks (individually or in groups) during the lab session.
- ▶ Continue working on lab tasks during the week.
- ▶ Solutions will be on Canvas on Friday.
- ▶ If you have any questions, you can ask on next Monday.

Office hours (Wednesday 11.00-12.00)

- ▶ Office Address: Ashton Building, Ground Floor, Room No. G.12B.
- ▶ Reply to emails.
- ▶ Individual one to one discussions via MS Teams chats.
- ▶ campuswire.com

Assessments

During the course there will be two assessments:
Each of the assessments is an individual work!

- ▶ Do it yourself.
- ▶ Don't share your work with others.

Learning Objectives

Learning objectives are explicit statements of observable actions students should be able to complete if they have acquired the knowledge and skills their instructor has attempted to teach them.

- ▶ Identify the main phases of the data mining process.
- ▶ Multiply, add matrices and vectors (by hand and with python).
- ▶ Compute the derivative of a function.
- ▶ Compute the gradient of a function.
- ▶ Find a minimum of a function using gradient descent method.

A few more points..

- ▶ Consider Learning Objectives as a study guide.
- ▶ In order to perform well with assessments make sure that you achieved the Learning Objectives.
