

Atari Learning Environment (Using Anaconda venv):

<https://ale.farama.org/environments/>

1. conda create --name gym_env python=3.10
2. conda activate gym_env
3. pip install
 - a. "gymnasium<1.1.0"
 - b. "gymnasium[atari,accept-rom-license] "
 - c. "gymnasium[classic-control] "
 - d. "stable-baselines3<2.5. "
 - e. ale
 - f. autorom
 - g. opencv-python

^ make sure you include the quotation marks where indicated (steps 3.a. to 3.d.)

In your script, include:

```
import ale_py
```

```
gym.register_envs(ale_py) #before you create the RL environment
```

Gymnasium Classic Control:

https://gymnasium.farama.org/environments/classic_control/

```
pip install gymnasium[classic-control]
```

Gymnasium Box2D:

<https://gymnasium.farama.org/environments/box2d/>

```
pip install swig
```

```
pip install gymnasium[box2d]
```
